Summary

AI/ML Engineer with postgraduate training in Artificial Intelligence and hands-on experience building Machine Learning, Generative AI, RAG, and agentic AI applications. Experienced in Python, FastAPI, LangChain, LangGraph, NLP, and machine learning, with a focus on building practical AI-powered solutions.

Skills

- **Languages:** Python, Java, SQL
- **ML & AI:** Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, LLMs, RAG, Agentic AI, Semantic Retrieval, Prompt Engineering
- **Frameworks & Libraries:** FastAPI, React 19, Streamlit, LangChain, LangGraph, Pandas, NumPy, Scikit-learn, Matplotlib, OpenCV, Dlib, spaCy, Resemblyzer
- **Databases & Tools:** PostgreSQL, Supabase, Cloud Firestore, Git, GitHub, VS Code, Jupyter Notebook
- **Core:** Data Structures & Algorithms, OOP, DBMS, Feature Engineering, Data Preprocessing, Model Evaluation

Projects

AI Career Copilot – AI-Powered Career Development Platform

GitHub | Demo

Python, FastAPI, React 19, LangChain, LangGraph, RAG

- Built a full-stack **AI career platform** with **5 core modules** covering ATS analysis, interview preparation, mock interviews, personalized learning paths, and job recommendations.
- Developed a **RAG-based career assistant** and **LangGraph multi-agent workflow** for personalized career assistance, resume improvement, and validation of AI-generated recommendations.
- Implemented a **deterministic ATS scoring engine** and **AI voice mock-interview system** with **STAR-based evaluation**, generating **20 interview questions** and testing the platform with **30+ students**.

SnapClass – Smart AI Attendance System

GitHub | Demo

Python, Streamlit, OpenCV, Dlib, Resemblyzer, Supabase

- Built an **AI attendance management system** with Teacher and Student portals, scheduling, monitoring, and attendance reporting.
- Implemented **multimodal identity verification** using **face and voice recognition** for secure attendance marking.
- Developed analytics dashboards with attendance insights, session tracking, subject management, and **role-based authentication**.

SkillGraph – AI Job Market & Layoff Analytics

GitHub | Demo

Python, Pandas, Scikit-learn, Streamlit, Plotly, Random Forest, K-Means, SMOTE

- Built an interactive analytics platform for analyzing **technology layoffs and workforce trends from 2020–2026** using data analysis and machine learning.
- Implemented **Random Forest** for AI-related layoff prediction and **K-Means clustering** to identify company workforce patterns, achieving **85.87% accuracy** on the evaluated dataset.

Achievements

- Solved **150+ problems** on **LeetCode**.
- **Project Lead** – SnapClass AI Project.
- Selected for the **Udyam Program**.

Certifications

- **AWS Academy Graduate – Generative AI Foundations** (*AWS Academy*)
- Prime Batch – **Artificial Intelligence & Machine Learning**
- NPTEL – **Data Structures and Algorithms using Java** (**Elite + Silver, Score: 81/100**)
- Alpha Batch – **Data Structures and Algorithms with Java**

Extra-Curricular

- **Career Guidance:** Guided and mentored **100+ students** on AI/ML careers, projects, interviews, and job preparation.
- **Technical Content:** Built a network of **3,000+ LinkedIn connections** by sharing content on AI/ML, Generative AI, RAG, and career preparation.
- **Entrepreneurship & Blogging:** Managed an online business and WordPress websites; created and published technical and general content.
- **Hobbies:** Travelling & Trekking, Cricket, Writing & Blogging.
